

# AGRORROOTS

AGRORROOTS is a pure kelp concentrate containing organic plant growth stimulants and should be used in conjunction with normal fertilizing programs. The real value of AGROROOT Kelp Concentrate lies in its delicate balance of natural growth biostimulants and its complimentary range of elements, enzymes, trace elements and vitamins. Scientific and field studies have shown that AGROROOT applications resulted in:

- Increased germination of certain seed types
- Cell division and elongation
- Increased leaf surfaces and chlorophyll counts
- Increased root systems; promotes rapid rooting response in many plant cuttings
- Increased drought resistance
- Increased utilization of fertilizer
- Increased resistance to root-knob nematode infestation
- Increased crop yields
- Increased stems and vascular bundle diameters

## Turf Cocktail™

Proven to stimulate and support beneficial soil microbes. Effective when turf is under stress.

Natural chelating agent, does not leach.

Provides slow release of nitrogen, carries other nutrients for 15 weeks.

Reduces need for fungicides.

Filtered for easy spray or use in fertigation system.

Organic wetting agent, increases cation exchange capacity, increases turf cell membrane permeability.

Turns on chlorophyllase.

Compatible with most fertilizers, pesticides, herbicides, and fungicides.

*Turf Cocktail is sold in easy to use five gallon pails and 30 gallon drums.*

### **Biostimulant / Fertilizer**

Made from whole fish, plant protein extracts, natural sugar.
