

BIRCHMEIER backpack sprayers are Swiss quality products, renowned for their long life. They have proved their worth all over the world under a variety of climatic conditions. BIRCHMEIER, founded in 1876, can call on more than 100 years experience, from which our manufacture and our advisory service benefit.

BIRCHMEIER

OPEN SYSTEM BACK SPRAYER

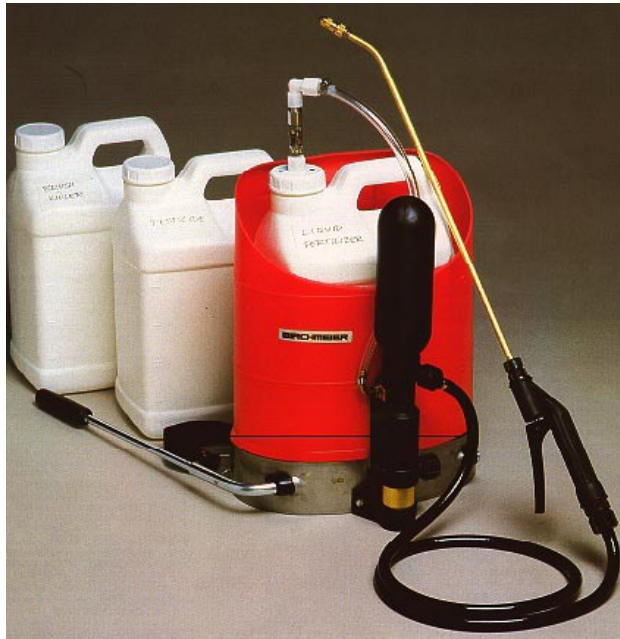

Interchangeable containers using 2.5 US GAL plastic jugs with 63 mm opening

1- Pump mechanism situated outside the tank, so that it does not come into contact with the corrosive liquid for any length of time.

2- It is made of corrosion resistant hard polyethylene, incorporating an UV light inhibitor, mounted in a solid metal base of stainless steel.

3- The machine is well balanced and fits comfortably on the operator's back. The straps can be individually adjusted by simply pulling the strap-end.

4- Sprayer equipped with quick disconnect on siphon tube assembly making it easy to exchange siphon tube with standard lid thus preventing possible spillage when changing containers. Back

flow prevention valve on pump side of quick coupler avoids leakage.

5- The rubber seal on the pump piston can be adjusted for maximum pump pressure by tightening brass wing nut 1/2 turn.

6- All BCS sprayers are equipped with the nylon check valve assembly to maximize durability.

7- The trigger control has standard 1/4" NPT threads thereby allowing the unit to be equipped with other accessories. Special

equipment available for this unit: - Spray shield (for herbicide application) - Spray boom (for herbicide and insecticide application) - Telescopic wand (extends 3 to 7 ft.)

8- Sprayer equipped with adjustable brass nozzle.
