For Algae and Fungus Control on all Turf Grasses

For Golf Courses, Greens, Tees and Fairways, Commercial Power Spray Applications - Use 1 pint in 50 to 100 gallons of water per 10,000 sq. ft or 1/4 acre (1.6 oz per 1,000 sq.ft or 1/2 gallons per acre). Saturate the entire treatment area, wetting all plant and soil surfaces. Repeat spray applications every 10 to 14 days as needed. Treatment is required during the warm growing season and may be made when the grass is dry or damp. Do not apply during wet rainy weather or just before irrigation or watering.

**DO NOT MIX WITH IRON BASE MICRONUTIRENTS,
DYE INDICATORS OR OTHER ANIONIC MATERIALS.**
