

the **PROPORTIONER SYSTEM**

A convenient system for utilizing the AQUA-AID difference that's as easy as hand watering.

- Up to 1-acre coverage per pellet
- Ideal for localized dry spots
- No mixing
- Simple
- Efficient
- Cost effective
- Saves water
- Non-toxic to any type turf or ornamental plant

Injection Pumps

Injection pumps provide an effective mixture of small volumes of an AQUA-AID wetting agent and regular irrigation water. Utilization of the "mix-before-application" method provides maximum benefits . . . AQUA-AID treats the water, enabling its properties to spread over and permeate otherwise resistant soil structures.

- Outstanding Effectiveness
- Ease of Application
- Cost-Cutting Benefits
