ROOT PRUNER

Tree roots damage walkways and cart paths plus steal moisture and nutrients from fine turf. Until now, root pruning was a difficult task, slow and messy, mostly done by a back hoe or ditch witch. The ROOT PRUNER by Imants makes root pruning simple, quick, and with No Clean Up. The ROOT PRUNER is the perfect remedy for reducing turf decline caused by competition with tree roots for water.

**540 &
1000 rpm
PTOs**

**Prunes 5"
Diameter
Roots**

**Variable
To 9"
Depth**

Tractor requirements:

30 - 60 HP

Hydrostatic / Creeper Gear

4-Wheel Drive (recommended)

1100 lb Lift Capacity

The ROOT PRUNER by Imants continuously aerifies and double prunes tree roots with diameters up to 5" at a depth of 9 inches with No Clean Up. Engineered, designed, and built in Holland, the ROOT PRUNER is equipped with 6 hardened steel blades that is driven by a patented triple reduction planetary gear box for maximum torque. The ROOT PRUNER also features a torque limiting PTO shaft, factory set, eliminating all shear bolts and spring clutches. Designed for tractors from 30 hp to 60 hp, hydrostatic or creeper gear, 540 pto, the ROOT PRUNER can double prune up to 3500 linear feet per hour with No Clean Up.
