RotaDairon, since 1958

DAIRON : A FULL RANGE OF IMPLEMENTS

Compact Soil Renovators™

All purpose soil finishers

Performs the following operations in a single pass : soil cutting, burying of stones - debris - grass and weeds, fine surface preparation and rolling.

Direct operation with the RD 150 compact Soil Renovator™.

RXX 400 Super heavy duty Soil Renovator™ for large areas : golf courses construction, sod farms, pastures renovation...

Combi-seeders

Grass seed drills

Combination of stainless steel seed drills for compact or heavy duty Soil Renovators™. Enables grass seed to be sown while performing any of the above operations.

Graders

Perfect leveling with special NIV graders (extra equipment)

RD 130 with NIV special grader blade.

RotaDairon®

Heavy duty Soil Renovators™

Soil preparation machines

For tackling the toughest jobs : burying of larger stones and debris with a greater working depth, and leaving a blended soil surface.

RM 130 combi-seeder on small site (RD 130 + SM 130).
